

CSO

Heavy duty fuse clip

1

Product

SCHURTER, the leading provider of fuse holders, is expanding its range to include a fuse clip designed for heavy duty performance. The CSO clip, designed for 10.3 mm diameter fuses, is suitable for applications with voltages up to 1500 VAC/VDC and currents to 32A. These unique characteristics are SCHURTER's response to the present need for increasing photovoltaic system voltages.

The CSO clip is available in solder and screw/rivet versions. The solder version allows direct mounting on a printed circuit board by means of through-hole technology. The screw/rivet version provides additional flexibility for basic designs. Due to the special copper alloy both versions are characterized by a strong clamping force resulting in minimal power loss.

The CSO fuse clip is ideal for a wide range of PV and other DC applications including inverters, battery charge controllers, and string fuse holders. Furthermore, the CSO is well suited for applications in the e-mobility and industrial electronics sectors. The fuse clip conforms to RoHS specifications and is currently the only photovoltaic clip on the market with cURus approval.

SCHURTER also offers the ASO 10.3x38 PV fuse to fit the new CSO fuse clip. The fuse clip also supports other fuses with a 10.3 mm diameter of any length. This includes, for instance, 10.3x85 mm fuses for higher voltages.

Technical features and benefits:

- High rated voltage of 1500 VAC/VDC
- High rated current of 32 A
- Minimal power dissipation due to strong clamping force (special copper alloy)
- Solder, screw or rivet mounting
- cURus approval

Product Marketing DC

Appropriate fuse links:

- SCHURTER fuse, 10.3 x 38 mm, 1000 VDC, gPV: [ASO 10.3x38](#)
- Fuse links with diameter 10.3 mm of any length, up to 1500 VAC/VDC and 32 A

Applications:

- Photovoltaic inverters
- String fuse holder
- Battery charge controllers
- DC applications
- Industrial electronics
- Drives
