# MicroStac® - 0.8 mm Mezzanine Connector System

## Applications

- Sensor engineering: Light barriers, switches
- Medical engineering: Intensive medical equipment, portable diagnostics
- Mobile communication: Mobile phones, PDAs, organizer, memory modules
- Car electronics: Car radios, mobile car phones, mobile car office equipment
- Control engineering: Mini PLCs, fieldbus modules, mini solenoid systems
- Facility management: Signal and indicator devices, alarm systems and bus modules

### Derating Curve

In spite of the small design of the ERNI MicroStac series, they reach a high current rating. The contacts feature large radiant surfaces to derive heat. The derating curve shows the 50pin version without PCB.

For further derating curves related to the according pin count see our webpage.

## Technical Features

### Controlled SMT Reflow Soldering Process

The heat-resistant thermoplastic insulator and precision coplanar contacts permit a controlled SMT soldering process.

### Safe Packaging and Fully Automated Feed

The antistatic tape and reel packaging not only protects the high-precision contacts and coplanarity of our MicroStac connectors, but also permits placement of connectors by automated pick and place equipment

### Easy Recognition and Secure Handling

The black insulation body ensures easy visual recognition by the automatic pick and place equipment.

### Contact Design for 5 mm Stacking Height

The MicroStac contacts are based on a patented hermaphroditic contact design with two contact points for compensation of tolerances.

## Mating Conditions

**Allowed misalignment tolerances longitudinal:  $\pm 0.7$  mm, transverse:  $\pm 0.5$  mm**

**Allowed angular inclination tolerances longitudinal:  $\pm 4^\circ$ ; transverse:  $\pm 4^\circ$**

**Wipe length - maximum "Board to Board" distances (5 mm Stacking Height) for secure mating: 1.5 mm**

<b>Technical data</b>		
Climate Category	DIN EN 60068-1 test b	-55/125/21
Temperature range		-55/125 °C
Current rating per contact		50 pin version: 1.6 A @ 20°C 1.3 A @ 70°C 0.8 A @ 100°C
Air – and creepage distance		0.4 mm
Voltage rating	IEC 60664	The permissible operating voltages depends on the customer application and on the applicable or specified safety requirements. Insulation coordination according to IEC 60664-1 has to be regarded for the complete electrical device. Therefore, the maximum creepage and clearance distances of the mated connectors are specified for consideration as a part of the whole current path. In practice, reductions in creepage or clearance distances may occur due to the conductive pattern of the printed board or the wiring used, and have to be taken into account separately. As a result the creepage and clearance distances for the application may be reduced compared to those of the connector.

## 6 Pin Single Row Version

- Pitch 0.8 mm
  - SMT process compatible
  - Hermaphroditic contact design, two contact points
  - One part number for interconnection saving admin and logistic costs
  - Integrated pick and place pad and very low weight for high speed assembly
  - Positioning pegs
  - Secure standing while solder process, large solder pads
  - Black insulation body and silver terminals for optical vision system (contrast measuring method)
  - Polarization and pre-alignment while mating
- Component weight 6 Pin: 0.14 g
  - Large wipe length 1.5 mm
  - Mated stacking height 5 mm
