

SMAT SERIES

The SMAT transducers are specifically developed to meet various requirements, such as loud sound pressure level, mounting methods, connection possibilities and dimensions. The transducers do not have a built-in oscillator. The drive frequency must be generated with electronics outside the transducer. Recommended drive circuits are described in this catalogue. Our transducers produce a highly reliable audible tone signal, giving either an extremely clear and penetrating tone or a soft sound for non-aggressive signals. They are available in five sizes: 13mm, 17mm, 21mm, 24mm and 30mm.

PRODUCT OPTIONS SMA & SMAT SERIES

Option Code	example	Description
SP01	SMAT-21-P10/SP01	Contains heavy duty wires (plastic insulation) <i>(only for SMA(T)-21 and SMA(T)-24)</i>
SP02	SMAT-21-P17.5/SP02	Contains heavy duty wires (plastic insulation), connection sealed with silicone <i>(only for SMA(T)-21, SMA(T)-24)</i>
SP04	SMA-13LC-S/SP04	The PCB of the buzzer/transducer is secured with epoxy-adhesive
SP05	SMA-24L-P17.5/SP05	Extended frequency control (only SMA series)
Wash Tab	SMAT-13-P7.5 +Wash Tab	Recommended for automatic washing production process. The PCB is secured with epoxy-adhesive+ wash tab upon the sound-emitting hole, avoiding liquid penetration into the cavity. TO BE REMOVED AFTER the washing process for good sound output!!!
MC	SMAT-13-P10-MC	Acryl coating (Membrane Coating). Recommended for aggressive, humid or smoggy environment.
FP13 FP13SR FP17 FP17SR FP21 FP24 FP30		7 different Foam Patches are available to cover the SMA(T) series for extra acoustic and mechanical stabilization. See page 38, 39

To order an option add the suffix to the model number of the SMA(T)-series.

Capton A heat protection label standard for all SMD buzzers, in capton material glued on the SMD model of the SMA(T) buzzer. This enables the user to pick up the buzzer by vacuum.
During the re-flow soldering process the heat shield label remains on the buzzer and must be removed after soldering.
